Additional information for review purposes.

Sorry for the late submission. AIR sent these to me Friday afternoon. I will work with them to get them to me earlier so you have sufficient time to review. This session is all about integrated DBDM across the tiers. Non-controversial materials. Good resources in IMHO. Ppt walks consultants through tier 1-level through individual student-level integrated data reviews using specific protocols created by AIR for PA labeled/named by their document title. I organized the attachments from ppt for session -> grade-level (tier 1) review --> identify students for advanced tiers --> advance tier team reviews (tier 2) --> individual student review (tier 3). I hope my organization makes your review more efficient..
