Support for Families of Students with Significant Disabilities

The TIES Center is the national technical assistance center on inclusive policies and practices. Its purpose is to create sustainable changes in K-8 school and district educational systems so that students with significant cognitive disabilities can fully engage in the same activities as their general education peers while being instructed in a way that meets individual learning needs.

What is the Parent Video Series?

Parents are their children's first and longest teachers. Their home is their child's first inclusive environment. The Parent Video Series supports families in understanding the important role they play in their child's learning and highlights ways they can teach their children with significant cognitive disabilities at home as part of ongoing routines. They also support conversations with their children's teachers for setting high expectations and link home-school supports.

Who is the Parent Video Series for?

The Parent Video Series is for families of children with significant cognitive disabilities. Others may benefit from the ideas captured in the videos, too, such as day care support. Also, teachers can share them with families to support home-school discussions.

What do the Parent Videos include?

Most videos focus on three key questions:

1. Why is it important that my child focuses on these key areas at home?
2. How can I help provide support at home?
3. What support can I ask for from my child's school?
