MICROSTRUCTURE

Irrespective of hour or season, whether viewed on clear days or stormy, the Tetons are so surpassingly beautiful that one is likely to gaze silently upon them conscious of the futility of speech. -Fritiof Fryxell

Boy those mountains sure do look pretty. Sandi Gillam

3

Aspects of literate, scholarly language or Microstructure

Coordinated Clauses

- FANBOYS (for, and, nor, but, or, yet, so)

Subordinating (adverbial) conjunctions

- **Before she ate the porridge**, Goldilocks made sure nobody was home.
- You have to sneak up behind the rabbit **if you want to catch him**.
- Please clean up the kitchen **while** the cake is baking.
- She felt bad **because** he laughed at her.

4

Microstructure

Elaborated Noun Phrases

- ...six mean and ugly robbers entered....

Mental and linguistic verbs

- knew, felt like, thought, decided to, said...

Adverbs

- When, after, because, if, since

Narrative Assessment Procedure (NAP)

Justice, Bowles, Pence and Gosse (2010)

Preschool children ages 3-5.

Designed to assess expressive language abilities in a narrative context using the wordless picture book "Frog Where are You?" (Mayer, 1969).

Children are asked to look at the pictures in the book and then tell a make-believe story (instructions for administration and scoring in the article)

Examines 18 items including sentence structure (compound, complex, negative, interrogative) phrase structure (elaborated noun phrase, compound noun, prepositional phrase), modifiers (adverbs), nouns and verbs in spontaneously generated stories.

Pence, Justice, Gosse, (2008)

Coders should be able to agree on 15 of 18 items and the total NAP score (18) on 3 consecutive master-coded videos

Total score possible = 54

Good inter-rater reliability for items (.75 for complex sentences - 1.00 for plurals, possessives, compound verbs, questions).

<http://www.narrativeassessment.com/>

Give suggestions in their manual for familiarization, practice and reliability

Examples of sentence structures, definitions and examples are provided in the manual

- Compound sentence, complex sentence, negatives, interrogatives, elaborated noun phrase, compound noun, prepositional phrases, adverbs, advanced modifiers, nouns, possessives, and verbs

You are coding for frequency of use (0, 1, 2, 3+) for each of 18 items

For modifiers, nouns or verbs you only code unique use

Unique use is not required for items in sentence and phrase structure categories

<p>One day a little boy .. he's be a frog. And he is going to your bed. The frog, he's going. When he peeks up, the frog is not in the room. He's calling to the frog. The dog, he's going down. He's calling to the frog. Frog, Frog. He's calling and calling. Then the dog he's calling too. The dog is running. And he go up. He's going to go down. He says "Is it over there?" The boy said "shhhh." He over there.</p>	<p>Sentence structure</p> <p>Compound - 0</p> <p>Complex – 3+</p> <p>Negative - 1</p> <p>Interrogative - 1</p>

One day a little boy ..
 he's be a frog.
 And he is going to your bed.
 The frog, he's going.
 When he peeks up, the frog is not in
 the room.
 He's calling to the frog.
 The dog, he's going down.
 He's calling to the frog.
 Frog, Frog.
 He's calling and calling.
 Then the dog he's calling too.
 The dog is running.
 And he go up.
 He's going to go down.
 He says "Is it over there?"
 The boy said "shhhh."
 He over there.

Auxiliary verb + main verb – 3+

Irregular past tense - 0

Regular past - 0

Tier two - 0

Compound – 0

Total score: 18/54

The Narrative Scoring Scheme NSS; Heilmann, Miller, Nockerts & Dunaway, 2010

Designed to code:

introduction (setting, characters)

- The presence, absence, and qualitative depiction of character and setting components.

character development (main character, supporting characters, first person)

- The acknowledgment of characters and their significance throughout the story.

mental & emotional states

- Score based on the vocabulary used to convey character emotions and through processes.

Oral retells generated from the wordless picture book *Frog, Where Are You?* (Mayer, 1969).

The Narrative Scoring Scheme NSS; Heilmann, Miller, Nockerts & Dunaway, 2010

Designed to code:

referencing (pronouns) & listener awareness

- Scores based on the consistent and accurate use of antecedents and clarifiers throughout the story. Use of correct pronouns and proper names should be considered when scoring.

conflict/resolution & event/reaction (related to plot)

- Scores based on the presence or absence of conflict/resolutions and event/reactions required to express the story as well as how thoroughly each was described.

The Narrative Scoring Scheme NSS; Heilmann, Miller, Nockerts & Dunaway, 2010

Designed to code:

cohesion (logical order, smooth transitions)

- Scores based on the sequence of, details given to, and transitions between each event.

conclusion (story is clearly wrapped up)

- Scores are based on the conclusion of the final event as well as the wrap up of the entire story.

The Narrative Scoring Scheme (NSS; Heilmann, Miller, Nockerts & Dunaway, 2010)

Included in the SALT software

Items are coded as proficient (score of 5), emerging (score of 3), or minimal/immature (score of 1).

The scores for each characteristic can be considered individually or combined into a total composite score (highest possible score being 35).

Compare your sample to the database

- Narrative story retell database, TD students in primary through 6th grade
- Bilingual/Spanish-English story retell database, TD bilinguals grades K-3
- Bilingual/Spanish-English unique story database, TD bilinguals grades K-3
- Monolingual Spanish Story retell database consisting of Spanish samples from TD students in K-3

Narrative Sample NSS in SALT

One day a little boy
he's be a frog.
And he is going to your bed.
The frog, he's going.
When he peeks up, the frog is not in the room.
He's calling to the frog.
The dog, he's going down.
He's calling to the frog.
Frog, Frog.
He's calling and calling.
Then the dog he's calling too.
The dog is running.
And he go up.
He's going to go down.
He says "Is it over there?"
The boy said "shhhh."
He over there.

Introduction = Launches into the story without providing the setting (1). Characters are mentioned but no detail or description (3). I'll split the difference and give a (2) here.

Character development = inconsistent mention of involved or active characters (1)

Mental & emotional states = no use of mental state words to develop characters (1)

Referencing/listener awareness = inconsistent use of referents and antecedents (3)

Conflict resolution = Underdeveloped (3)

Cohesion – no use of smooth transitions (1)

Conclusion – some indication of an event (frog not in the room), and then finding the frog (he over there) but very unclear (1 or 2).

Total = 12 or 13

Bottom line: needs to work on all of these items.

Single scene (scored using NSS)

(Um) them are (um um) they was (um) they was (um) they ran away cause (they) they was (um) them out

I was talking about (them) them sea shells things

But they ran away and that girl right there she was not scared

But the boy told her, "run away!"

(And then) and then and (he) he said he waved at 'em

(And) and that woman smiled and a (um) and a man smiled

(And) and he took his puppy with 'em

But everybody was scared

They had to run away and go home.

Introduction: no mention of setting, main characters are mentioned with no detail or description (1 for setting, 3 for character = 2)

Character development: inconsistent mention of involved or active characters (1)

Mental and emotional states: some use of evident mental state words to develop character (3)

Referencing/listener awareness: inconsistent use of referents and antecedents (3)

Conflict resolution/event reaction: Underdeveloped (3)

Cohesion: minimal detail for events, transitions unclear (3)

Conclusion: specific event concluded but no statement as to the conclusion of the story: (3)

Total: 18/35

NSS

introduction (setting, characters)

character development (main character, supporting characters, first person)

mental & emotional states

referencing (pronouns) & listener awareness

conflict/resolution & event/reaction (related to plot)

cohesion (logical order, smooth transitions)

conclusion (story is clearly wrapped up)

Comprehensive Progress Monitoring Tool

Monitoring Indicators of Scholarly Language (MISL)

Spontaneously generated narratives elicited from a single picture prompt from the Test of Narrative Language-2 (TNL-2: Gillam & Pearson, 2017) for children ages 5-10.

Designed to measure growth in **macrostructure** (character, setting, initiating event, internal response, attempts, consequence) and **microstructure** (coordinating and subordinating conjunctions, adverbs, mental/linguistic verbs, elaborated noun phrases).

Easy to score

Monitoring Indicators of Scholarly Language Gillam & Gillam (2010)					
Story Grammar Element	Description	Example	Description	Example	Description
Character	1 Point: The main character is included in only one sentence.	1 Point: The main character is included in only one sentence.	2 Points: The main character is included in more than one sentence.	3 Points: The main character is included in more than one sentence.	4 Points: The main character is included in more than one sentence.
Setting	1 Point: The setting is included in only one sentence.	1 Point: The setting is included in only one sentence.	2 Points: The setting is included in more than one sentence.	3 Points: The setting is included in more than one sentence.	4 Points: The setting is included in more than one sentence.
Initiating Event	1 Point: The initiating event is included in only one sentence.	1 Point: The initiating event is included in only one sentence.	2 Points: The initiating event is included in more than one sentence.	3 Points: The initiating event is included in more than one sentence.	4 Points: The initiating event is included in more than one sentence.

Internal Response	2 Points: There are at least feelings, desires or thoughts explicitly stated	The girl and boy are the character and they can use to mean them.	1 Point: Words are used to describe feelings, but are not fully stated in the IR.	The boy uses a specific word in the part (IR). There was a happy dog.	1 point: The feelings, desires or thoughts of the character are explicitly stated in the IR. (1)	2 points: The specific feelings, desires or thoughts are explicitly stated and linked in the IR. (2 or more stated (3))	The opening inside. The girl was <u>glad</u> to be in the room. She was <u>happy</u> when they were finally
Plan	2 Points: No comment is provided about the character's plan to solve the problem.	The class had and the girl can use to mean them.	1 point: Use "going, going" or "a cognitive travel" with words to mean the character may want to be in the IR. The comment is NOT directly related to the IR.	The girl decided to have a picnic with her brother.	2 points: There is a comment about how the character has react to the IR. The comment is directly related to the IR.	3 points: There are 2 or more comments about how the character may react to the same or difference of complex situation. (3)	The class inside. The girl <u>decided</u> to go over them. The next over and said, "We" the boy thought he would be in an as. His was home and one was last go.
Action/Attempt	2 Points: No actions are taken by the main character(s) in action verbs contained in the story. Basically, a series of reactions/descriptions	There is a girl. There is a boy. It is a story.	1 point: Actions are taken by the main character(s) that are not directly related to the IR. Descriptive actions	The opening inside. The boy and the girl was a part.	2 Points: One or more actions are taken by the main character(s) that is directly related to the IR. (1)	3 Points: The opening of the class inside in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to be in the part. The girl was <u>glad</u> to	

Consequence Sub Code = CO	0 Points: No mention of the action being stated.	1 Point: One consequence is explicitly stated. The opening is bracketed (SE). The story goes on (SE). The boy was afraid (SE). *An animal appears that was not seen as a consequence.	2 Points: One consequence is stated only as an action. The girl sat over there (A). She fell and got hurt (C).	3 Points: One consequence directly linked to SE. The opening came from space and landed (SE) in the park. The story goes on (A). (A) look at the earth (A) and then they flew back to their home (C).	4 Points: Two or more consequences. The opening landed (SE). The story goes on (A) and landed at the earth (C) and then they flew back to their home (C). They found the hole (A) and flew on home (C).			
Literate Language	Description	Example	Description	Example	Description	Example	Description	Example
Coordinating Conjunctions FANBOYS (for, and, nor, but, or, yet, so) Cave conditions: sunlit, rocky, or climatic	0 points: No coordinating conjunctions in story.		1 point: One coordinating conjunction used in story.	The girl and the boy were running.	2 points: Two different coordinating conjunctions used in story.	The girl and the boy were afraid but they were happy.	3 points: Three different coordinating conjunctions used in story.	Telly and John saw home egg, their story was very long so they were back to the path.
Subordinating Conjunctions	0 points: No subordinating conjunctions.		1 point: One subordinating conjunction used in the story.	When the alien landed the girl sat.	2 points: Two different subordinating conjunctions used in the story.	The girl sat the alien while she was playing in the park. She was home because she was afraid.	3 points: Three or more different subordinating conjunctions used in the story.	After the alien landed, they went out of the spaceship. John said, if they have no gun they will kill us. Telly said, I don't think they will kill us either.

Mental/Linguistic Verbs Sub Code = ML	0 points: No mental/linguistic verbs.	1 point: 1 mental/linguistic verb. The boy thought it was hot.	2 points: 2 DIFFERENT mental/linguistic verbs explicitly stated. He decided to go and meet the alien. He said "Hello".	3 points: 3 or more different mental/linguistic verbs explicitly stated. He decided to go and meet the alien. He said "Hello". He thought "This is weird".	4 points: 4 or more different mental/linguistic verbs explicitly stated. He decided to go and meet the alien. He said "Hello". He thought "This is weird". He felt "This is strange".
Adverbs Sub Code = ADV	0 points: No adverbs.	1 point: One adverb that connects time, attitude, tone, or manner. The boy was very happy.	2 points: Two different adverbs. The boy and the girl were very happy. They felt quality.	3 points: 3 or more different adverbs. The boy and the girl were very happy. They felt quality. They felt "This is weird".	4 points: 4 or more different adverbs. The boy and the girl were very happy. They felt quality. They felt "This is weird". They felt "This is strange".
Elaborated Noun Phrases Sub Code = ENP	0 points: No noun phrases.	1 point: A noun phrase contains one modifier that provides the noun. The dog is happy.	2 points: A noun phrase contains two modifiers that provide the noun. The dog is happy. The dog is very happy.	3 points: A noun phrase contains three modifiers that provide the noun. The dog is happy. The dog is very happy. The dog is very happy.	4 points: A noun phrase contains four or more modifiers that provide the noun. The dog is happy. The dog is very happy. The dog is very happy. The dog is very happy.
Verbs Sub Code = V	0 points: No verbs.	1 point: 1 verb.	2 points: 2 verbs.	3 points: 3 verbs.	4 points: 4 verbs.

<p>Based on the research and observations of many including: Anderson, 2011; Carstairs & Juncos, 2004; Greenleaf & Strong, 2001; Hughes, McElroy & Schenck, 1997; Swanson, Gilman & Gilman, 2002; Pelagatos, 1991.</p> <p>*Contributors from: Michelle M. Davis, Emma Tansley, Bionny Lamb, Sam Hopton, Julie Sage, Alie Housch, Alie O'Connor, Kate Squares, Hope Soper, Nicole Wilson, Jack Wilson.</p> <p>Story used to illustrate narrative: _____</p> <p>True main characters were: _____</p> <p>True minor characters were: _____</p>	<p>Additional Example of Microstructure elements (not an exhaustive list)</p> <p>Coordinating conjunctions may include <i>and</i>, <i>then</i>, <i>then</i>, <i>for</i>, <i>or</i>, <i>yet</i>, <i>but</i>, <i>nor</i>, and <i>so</i>. They may coordinate nouns in a noun phrase (The boy and the girl), verbs in a verb phrase (They were running and playing) or clauses (The boy ran back home but he got there too late).</p> <p>Subordinating conjunctions include <i>after</i>, <i>although</i>, <i>as</i>, <i>because</i>, <i>if</i>, <i>for</i>, <i>like</i>, <i>once</i>, <i>since</i>, <i>that</i> (that that, in that, in order that, such that), <i>unless</i>, <i>when</i>, <i>where</i>, <i>while</i>. These words set up a hierarchical relationship between clauses. You must have 2 clauses to have a subordinating conjunction. "That" in the sentence, "I saw that" is not subordinating. "That" in the sentence, "I saw that you really liked him," is subordinating.</p> <p>Adverbs may relate to time (e.g. <i>all of a sudden</i>, <i>suddenly</i>), again, now, tomorrow, yesterday, manner (e.g. <i>somehow</i>, <i>well</i>, <i>slowly</i>, <i>accidentally</i>), degree (e.g. <i>very</i>, <i>almost</i>, <i>hardly</i>), number (e.g. <i>here</i>, <i>outside</i>, <i>above</i>, <i>right there</i>), number (first, second) and affirmation or negation (e.g. <i>definitely</i>, <i>really</i>, <i>never</i>, <i>not</i>).</p> <p>Elaborated Noun Phrase: An ENP is a group of words comprising a noun at its head and one or more modifiers providing additional information about the noun. Modifiers may include articles (e.g. <i>a</i>, <i>an</i>, <i>the</i>), possessives (e.g. <i>my</i>, <i>his</i>, <i>their</i>), demonstratives (e.g. <i>this</i>, <i>that</i>, <i>these</i>), quantifiers (e.g. <i>every</i>, <i>each</i>, <i>some</i>), wh-words (e.g. <i>what</i>, <i>which</i>, <i>whoever</i>), and true adjectives (e.g. <i>small</i>, <i>long</i>, <i>uply</i>).</p> <p>Simple elaborated noun phrase consist of a single modifier and a noun. Examples include <i>one day</i>, <i>big dog</i>, <i>happy</i> (adjective + noun), <i>that girl</i> (determiner + noun), and <i>close one</i> (demonstrative + noun). Complex elaborated noun phrase (CENP) consist of two or more modifiers and a noun. Examples include <i>big red house</i> (adjective + adjective + noun), <i>a tall one</i> (article + adjective + noun), and <i>some new boys</i> (quantifier + adjective + noun).</p> <p>Mental and Linguistic Verbs: Mental verbs may include <i>think</i>, <i>know</i>, <i>believe</i>, <i>imagine</i>, <i>feel</i>, <i>consider</i>, <i>suppose</i>, <i>decide</i>, <i>forget</i>, and <i>remember</i>. Linguistic verbs may include <i>read</i>, <i>write</i>, <i>sip</i>, <i>tell</i>, <i>speak</i>, <i>answer</i>, <i>ask</i>, <i>reply</i>, <i>whisper</i>, and <i>yell</i>.</p>
---	--

Monitoring Indicators of Scholarly Language Gilman & Gilman (2010)					
Very Grammar Element Character Sub Code = CH	Description	0 = Not present	1 = Emerging	2 = Present	3 = Mastered
Setting Sub Code = S	0 Points: No reference to a specific time or place.	The boy and the girl were walking.	1 Point: Includes reference to a specific place or time ("not necessarily related to a story").	2 Points: 1 reference to a specific place or time in the story. ("must be related to a story").	3 Points: 2 or more references to specific places and/or times in the story.
Initiating Event Sub Code = IE	0 Points: A problem or "starting" event is not stated.	The girl looked at the boy. The boy and girl were walking in the park. The boy is next to a car. There is a tree.	1 Point: Includes at least one event or position that does not motivate action from the character.	2 Points: A sequence landed in the park (potential initiating event). There were alien laughing and a dog running and a table and... (no action/sequence related to potential IE).	3 Points: A sequence landed in the park (IE). The girl ran (A) out to any active response from the character(s). "It is them. They became friends (C). Then, the spaceship caught on.

Anchor Standards: Key Ideas and Details	MISL Item
CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RL.2.1 Ask and answer such questions as who, what, where, when, why and how to demonstrate understanding of key details in a text. CCSS.ELA-Literacy.RL.3.1 Ask and answer to demonstrate understanding of a text, referring explicitly to the text as the basis for answers	Key details – individual scores for each story element (macrostructure scale) Who – character score; What – take-off score Where – setting score; When – setting score and coordinated conjunction score; Why – plan & action scores and subordinated conjunction score; How – action and adverb scores
CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RL.2.2 Recount stories, including fables and folktales from diverse cultures, and determine their central message, lesson, or moral CCSS.ELA-Literacy.RL.3.2 Recount stories, including fables and folktales, and myths from diverse cultures; determine the central message, lesson, or moral and explain how it is conveyed through key details in the text.	Retelling/recounting/Key details – total macrostructure score Central message, lesson, moral – take off + action + landing; feeling, subordinated conjunction & mental verb scores Explain how – subordinated conjunction and adverb scores; take-off, internal response, plan, attempt, and landing.
CCSS.ELA-Literacy.W.1.3 Write narratives in which they recount two or more appropriately sequenced events, including some details regarding what happened, use temporal words to signal event order, and provide some sense of closure CCSS.ELA-Literacy.W.2.3 Write narratives in which students recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.	Recount 2 or more sequenced events – take off + action + landing (scores of 3) Details – take off + action + landing, individual macrostructure element scores; adverb score Temporal words – coordinating conjunctions score Closure – landing score Thoughts – feelings and mental verb scores Linking words and phrases – coordinating and subordinating conjunctions scores

MISL

David and Amber was having a picnic at the woods

And them saw a ship coming

And them hid behind the bushes

And them peeked over the bushes

Them saw people coming out and it looked like them

but David said "they might be aliens"

"Come on let's go say hi to them"

"Uh huh I'm not going you can go"

The end

Character – 3 (David & Amber)

Setting – 1 (woods)

IE – 2 (ship coming)

IR - 0

Plan - 0

Attempt – hid, peeked no complication (2)

Consequence - 0

David and Amber was having a picnic at the woods

And them saw a ship coming

And them hid behind the bushes

And them peeked over the bushes

Them saw people coming out and it looked like them

but David said "they might be aliens"

"Come on let's go say hi to them"

"Uh huh

I'm not going

you can go"

The end

Coordinating conjunctions – and, but - 2

Subordinating conjunctions – 0

Mental state verbs – 0

Linguistic verbs – said, say 2

Adverbs – out, like 2

Elaborated noun phrases - 1

Total = 15

Holistic scoring

In addition to determining the macrostructure and microstructure elements that are important for creating a cohesive, complete story, it is important to judge the aesthetic quality of the story as well

The story can contain all of the macrostructure & microstructure elements and still be disorganized and unclear, and contain unnecessary information

This is particularly true for students with Autism Spectrum Disorder.

Scoring Example

There once was a twelve year old Melissa Wilson had been working on how to practice soccer and football.

Her most favorite was soccer.

She used to play with her best friend Ung he was named after his head.

His parents thought that it was a great name for him because he was born without any hair.

So they named him Ung, known for the boy, the last avatar or known as the last air bender.

Melissa was practicing on her soccer lesson, then Ung suddenly fell down and just broke his leg

Then she tried to run past, and she jumped way over him

And she almost tripped, but she didn't trip.

And then Melissa suddenly tripped when she made a goal, and she won the game

It was the actual game.

So Melissa helped the wounded boy as he was going to be driven to the hospital

Holistic Scoring for Organization & Clarity

McFadden & Gillam, (1996). An examination of the quality of narratives produced by children with language disorders, LSHSS, 27, 48-56

Students were asked to produce 3 narratives using picture stimuli: a nature scene, a portrait, and a an outdoor action picture

Anchor stories were selected from a corpus of narratives (Appendix) to represent weak, adequate, good, and strong narratives for scoring

The goal is for the student to be able to produce a **strong** narrative

Weak = 1

Poorly organized, uncaptivating

Adequate = 2

An event recount without a central climax a bare bones narrative with no elaboration, a narrative without an ending or a confusing narrative with strong descriptive segments

Good = 3

Captivating stories that contained problems and resolutions, may have had some organizational difficulties

Strong = 4

Easily understood clear, integrated story line, elaboration, interesting word choices climax twists

Average the holistic scores from the 3 stories to determine the final score

Scoring Example

There once was a twelve year old Melissa Wilson had been working on how to practice soccer and football (ungrammatical)

Her most favorite was soccer.

She used to play with her best friend Ung, he was named after his head.

His parents thought that it was a great name for him because he was born without any hair.

So they named him Ung, known for the boy, the last avatar or known as the last air bender. (too much detail)

Melissa was practicing on her soccer lesson, then Ung suddenly fell down and just broke his leg.

Then she tried to run past, and she jumped way over him.

And she almost tripped, but she didn't trip.

And then Melissa suddenly tripped when she made a goal, and she won the game

It was the actual game. (too much detail)

So Melissa helped the wounded boy as he was going to be driven to the hospital

Adequate: An event recount without a central climax a bare bones narrative with no elaboration a narrative without an ending or a confusing narrative with strong descriptive segments

Good: Captivating stories that contained problems and resolutions, may have had some organizational difficulties

TNL-2

Story	
23. Story makes sense	
0 Two or more statements do not make sense or are out of sequence.	
1 One statement does not make sense or is out of sequence.	
2 All statements make sense.	
24. Story is complete or complex	
0 Incomplete—missing a beginning, actions, or an ending	
1 Complete—has a beginning, middle and ending	
2 A complete story with elaboration that goes beyond what is pictured	

The TNL-2 has items that address holistic scoring in 3 progressively more difficult contexts: McDonald's retell, the Late for School, and the Aliens prompts

This would allow the clinician to determine whether the student needed to work in retell, sequenced picture or single scene prompts.

After the student was producing narratives that were complex and contained sentences that made sense, he or she could move up to the next more difficult context (from retell to sequenced pictures)

When monitoring progress consider:

Macrostructure goal: Work on stabilizing the use of story elements and causal framework to create a clear story that contains a basic episode with sufficient but not too much detail.

Plan:

Context for monitoring progress: Sequenced pictures

Present level of performance: Story contains all the macrostructure and many of the microstructure elements. Very disorganized, too much information, rambling.

Scaffolding: Use graphic organizer, pictographic planning, video modelling to help student identify when story is disorganized, contains too much elaboration, too many details.

Strategies: Teach student to use editing rubric to rate other stories and to judge his or her own stories

Next Steps: When stable, move to single scenes with obvious initiating event to practice skills in more difficult context. Then to single scenes with no OII. Then, story starters...**Success**

Our MISL was designed for analyzing spontaneous stories

Is it psychometrically adequate?

- Examined two single picture contexts: modeled, spontaneous

To examine the usefulness of the MISL as a progress monitoring tool for narrative language in **school-age children**

Classroom based study

Examine whether MISL has basic psychometric adequacy in 2 elicitation contexts (modeled spontaneous, spontaneous)

- Examine whether MISL had potential for capturing incremental differences in performance between experimental and control groups?
- Use MISL to measure outcomes of intervention between experimental and control groups

Gillam, Olszewski, & Fargo & Gillam, 2014. Classroom based narrative and vocabulary instruction: results of an early-stage nonrandomized comparison study. LSHSS, 45, 204-219.)

Classroom Study

506 students (K-5th)
75% eligible free or reduced lunch
86% minority students
12% special education services
12% English language learners

Participants

	Control	Treatment
Students	20	21
Boys	10	9
Girls	10	12
Bilingual (Spanish and English)	7 (3 boys, 4 girls)	7 (3 boys, 4 girls)
Attrition	3 girls (2 bilingual)	0

Method

Children in one first grade class received narrative language intervention

- 3 times per week, 6 weeks
- SLP & classroom teacher

Children in the other first grade class received their typical instruction

- 3 times per week, 6 weeks, an undergraduate student in SLP assisted the teacher in the classroom

Progress Monitoring plan

Children were asked to tell stories prior to the start of intervention, 2 weeks into the intervention, and after 6 weeks of intervention

Children were also given the Test of Narrative Language prior to and after intervention

The MISL was used to score a modeled story (from the TNL) and a series of single scenes (no model)

Stimuli

Modeled Context

I'm going to tell you a story that goes with this picture. After that, I'll ask you questions about my story. Then, I'll show you a picture for you to make up a story about. Try to make your story even better than mine.

Stimuli

Single Scene (Aliens)

Spontaneous (Generalization) Testing Procedure

Directions: I am going to show you a picture. I want you to tell me a story about this picture. Stories have a beginning, middle, and end. Tell me the best story you can.

Prompting allowed:

"How does your story start?"

"Do you want to tell me more?"

"Is that all?"

Stimuli

Single Scenes

Spontaneous context Scene Order

Transcription

Each audio recorded story was transcribed using (Systematic Analysis of Language Transcription (SALT: Miller, 2008)

Prior to conducting analyses for the psychometric adequacy of the MISL, the single scenes used to elicit spontaneous narratives were compared for equivalency.

ANOVA indicated there were no significant differences between the scenes in terms of language productivity for MLU $F(2,27) = .96, p = .40$, NDW $F(2,27) = 2.36, p = .11$, NTW $F(2,27) = 1.91, p = .17$.

Factor	Findings (Value Added; Typical or At-risk Children)	Relevance
Internal Consistency	Macrostructure Modeled single scene; $\alpha = .69$ & $\alpha = .80$ (with grammaticality & tense OUT). Spontaneous single scene; $\alpha = .68$ Microstructure Modeled single scene; $\alpha = .64$ & $\alpha = .76$ (with grammaticality & tense OUT) Spontaneous single scene; $\alpha = .68$	Items in each "subtest" & micro) rated reasonable internal consistency; measuring similar construct
Inter-rater reliability	Point by point agreement between raters = 90% or greater	Scored and reliably by multiple raters
Sensitivity to change	$F(2, 66) = 2.39, p = .10$, partial eta = .0	Children in experimental group showed more improvement than controls did not.

43 children attending 2, first-grade classrooms participated in the study.

Children in each classroom were divided into high- and low-risk subgroups on the basis of their performance on a narrative test.

Narrative and vocabulary instruction was provided by an SLP in 1 classroom for three 30-min periods per week for 6 weeks.

Table 1. Narrative and vocabulary scores at pretest for high- and low-risk children in the experimental and comparison classrooms.

Measure	Experimental <i>M</i> (<i>SD</i>)	Comparison <i>M</i> (<i>SD</i>)	<i>p</i>

Low risk	72.00 (12.10)	60.00-84.00	78.00 (12.10)	66.00-90.00	0.21

The children in the experimental classroom made **clinically significant improvements on narrative measures**; children in the comparison classroom did not.

Within the children in the experimental classroom, the high-risk subgroup demonstrated greater gains in narration than children in the low-risk subgroup. There were no subgroup differences in the comparison classroom.

These tools should help you:

1. Evaluate individual response to intervention 
2. Intervention effectiveness 
3. Compare intervention approaches
 - approaches
 - intensity
 - group v. individual

Progress-monitoring must measure systematic, incremental change in response to instruction.

- MISL
 - Narration (oral, written)
 - Story comprehension
 - Vocabulary

It must also be associated with eventual GAIN on standardized measures and/or measures of academic achievement

SLPs have knowledge and skills to design and implement PM measures in collaboration with school personnel & make judgments about the efficacy and effectiveness of the instruction being provided
